WESTERBEKE D-NETTM DIESEL GENERATOR

8.0 EDT 60Hz 6.0 EDT 50Hz

Available fully networked to NMEA 2000®

8.0/6.0 EDT Marine Diesel Generator

The First Electronic Diesel Generators Available NMEA 2000[®] Certified

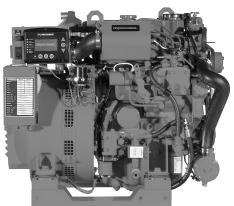

Westerbeke, the **first** company to bring constant speed **EFI** generators and **Safe-CO[™]** generators to the marine market, introduces another first. The wave of the future, Westerbeke D-NET[™] electronic generators are offered with standard Westerlink[™] or optional NMEA 2000[®] compliant databus communication. NMEA 2000[®] is a network for shipboard communications developed under National Marine Electronics Association (NMEA) standards. <u>NMEA 2000[®]</u> generators, combined with other certified components, allow boat builders and their customers to significantly reduce the cost, weight and space normally required to run cables throughout the vessel. All certified components freely communicate and are linked to just one NMEA 2000[®] cable using "T" connections that simplify networking.

Information At Your Fingertips

All Westerbeke D-NET[™] generators have available digital controls offering simplified and easy to understand information on operational status and, if necessary, system diagnostics. Westerbeke also features "at a glance" illuminated lights indicating proper operation. They monitor battery voltage, generator voltage, generator frequency, oil pressure, coolant and exhaust temperature. All this information may be viewed from a distance—all green lights indicate referenced systems are functioning properly. Further details are available on the screen display. The user may conveniently scroll for operational or diagnostic information without encountering "codes". Westerbeke uses text so the user does not have to refer to a manual to decipher numeric information.

Quiet, Slow-Speed Digital Operation

Operating at 1800-rpm with a newly designed, tuned air intake silencer and 3-cylinder engine, the 8.0 EDT generator runs smooth and quiet. Augmenting this desired effect is the electronic governing that virtually eliminates "droop" when load is applied. Include the optional Sound Guard SST with high quality stainless steel base and frame with stylish powder coated aluminum panels and you have a generator as attractive as it is quiet.

8.0/6.0 EDT Marine Diesel Generator

Standard Features

- Digital display and diagnostics panel
- Electronic governing
- Safety shut-downs: overspeed, underspeed, low oil pressure, high exhaust and high coolant temperature
- AC circuit breaker
- 50 amp battery charging alternator
- Power take-off interface
- Self-bleeding fuel system
- Fresh water cooling and coolant recovery tank
- 45 degree water injected exhaust elbow
- Gear driven raw water pump
- Tuned air intake silencer
 Anti-vikustise resurts foil of a
- Anti-vibration mounts fail safe rubber type
- Lube oil drain hose and drip tray
 Oil fill top and side
- Oil fill top an
 Belt guard
- Belt guard

WESTERBEKE Engines & Generators

- Operators' Manual and parts list
- 5-year limited warranty
- Complies with U.S. EPA regulations

Digital Display

Generator Design

DESIGN: Brushless, four pole, revolving, power take-off. **VOLTAGE REGULATION:** Standard +/- 5% no load to full load. **FREQUENCY REGULATION:** .5 Hz (.60%) no load to full load. **INSULATION:** Class "H", as defined by NEMA MG1-1.65. **TEMPERATURE RISE:** Within NEMA MG1-22.40 definition when operating at full load.

COOLING: Cast centrifugal blower, direct connected. ELECTROMAGNETIC INTERFERENCE LEVEL: Exceeds requirements for most marine radio-telephones and standard TVs.

| | Electrical Characteristics | | | | | Ratings | | Engine | |
|--------------|----------------------------|-----------|-------|-------|------|--------------|-----|--------|--------|
